

## **Marina Notice – Lake Texoma Geotechnical Exploration Activities**

### **NOTICE TO BOATERS**

#### **US-70 Roosevelt Bridge Geotechnical Exploration Activities**

##### **Summer 2026**

Please be advised that geotechnical exploration activities associated with the US-70 Roosevelt Bridge Project will be occurring on Lake Texoma between May 27, 2026, and September 2026.

Activities will consist of drilling operations from two floating barges approximately 50 feet by 80 feet in size located within the project area near the US-70 Roosevelt Bridge crossing.

Key information for boaters:

- No boating restrictions or channel closures are currently anticipated
- Boaters will continue to be able to navigate from one side of the bridge to the other
- Barges will be illuminated with lighting at all four corners during nighttime operations
- A small work skiff may periodically assist during barge relocation activities to notify approaching boaters

Boaters are requested to exercise caution and maintain safe speeds when operating near construction equipment.

We appreciate the cooperation of the boating community during these activities.

For questions regarding the work, please contact the project team listed below:
